

# AE CINEMA PRESETS

Thank you for purchasing the Rocket Rooster **AE** presets pack. Please take a few minutes to read through this document.

## **GETTING STARTED**

### **WHATS IN THE PACK?**

The pack consists of a series of After Effects presets designed to quickly get you a look that you can use as a starting place for your final grade.

In this pack you will also find a set of 3D LUTs (also called look up tables) that are for converting your footage straight out of the camera's LOG to a REC709 image.

TOOLS FOR DIGITAL CINEMA

## **SYSTEM REQUIREMENTS**

You will need to have a computer with at least 4GB ram, the more the better, and a graphics card.

More importantly you will need to have Adobe After Effects CS5 and above.

For the LOG to REC709 LUTs you will need to have a plug in called LUT BUDDY by Red Giant if you are running CS5. For CS6 and above you can use the built in plug in "apply color LUT" in the utility folder.

LUT BUDDY is a free plug in, you can find the link on the rocketrooster.ninja website or on redgiant.com

NOTE: LUT BUDDY MAY CRASH SOME SYSTEMS SO BE SURE TO USE LUTs with .mga FILE EXTENSION ONLY.

## **INSTALATION**

simply copy and paste the Rocket Rooster AE presets folder to your PRESETS folder in the After Effects Files folder.

Save the LUTs folder wherever you want to outside of the After Effects Files folder as these can be referenced from any location.
